November 2026 Night Sky Calendar

Planets, Moon pairings, meteor showers and Moon phases, Eastern Standard Time

November 2026

SUN	MON	TUE	WED	THU	FRI	SAT
1 (1)	2 (2)	3	4 (3)	5 (3, 4)	6	7 (5)
8	9 (6)	10	11 (7)	12 (7)	13	14
15 (8)	16 (8, 9)	17 (9, 10)	18	19	20 (11)	21
22	23	24 (12)	25 (13)	26	27	28
29	30 (14)					

1	**Sun., Nov. 1**	Last quarter Moon, 3:28 p.m.; clocks fall back	☐
2	**Mon., Nov. 2**	Before dawn: Moon 2° from Mars, Jupiter nearby	☐
3	**Wed., Nov. 4 to Thu., Nov. 5**	Southern Taurids peak	☐
4	**Thu., Nov. 5**	Taurid fireball swarm peak (AMS)	☐
5	**Sat., Nov. 7**	Before dawn: crescent Moon 1.6° from Venus, low east-southeast	☐
6	**Mon., Nov. 9**	New Moon, 2:02 a.m.	☐
7	**Wed., Nov. 11 to Thu., Nov. 12**	Northern Taurids peak, Moon 4% lit	☐
8	**Sun., Nov. 15 to Mon., Nov. 16**	Before dawn: Mars and Jupiter 1.2° apart	☐
9	**Mon., Nov. 16 to Tue., Nov. 17**	Leonids peak; Moon sets before midnight	☐
10	**Tue., Nov. 17**	First quarter Moon, 6:48 a.m.	☐
11	**Fri., Nov. 20**	Mercury farthest from the Sun in the morning sky (20°)	☐
12	**Tue., Nov. 24**	Full Beaver Moon, 9:53 a.m.; before dawn it covers Pleiades stars for the western U.S.	☐
13	**Wed., Nov. 25**	Uranus at opposition, magnitude 5.6, in Taurus	☐
14	**Mon., Nov. 30**	Before dawn: Moon 1.9° from Jupiter	☐
